COMP20030 Web Design

Project

Student No. 18452452

John Engracio

My website is based on a fictional burger-focused restaurant/takeaway. Some of the key features of it is:

- Easy to navigate through the pages.
- Making sure nothing looks too intrusive (not give the visitor too much information at a time).
- The website is responsive based on what device the visitor is using.
- Easy to view and understand for visitors so they can find the information they are looking for.
- A minimalistic and modern look which makes it easier for visitors to see which page they are currently on.
- All photos are royalty free (or licenced for reuse).
- All photos are optimized so they can load faster.
